POTENTIAL USES OF CA

Discussion: What do you already know about CA?
POTENTIAL USES OF CA

CA as methodology /
CA as a body of empirical findings
CA AS A METHODOLOGY

Table 9.1 Sequence of analytic tasks

Task 1 Select a sequence and examine the opening and closing as achievements.

Task 2 Select a turn within the sequence for close analysis.

Task A Characterize the actions performed in the turn. Consider how the actions fit within sequences of actions.

Task B Describe the methods used to perform the actions. Consider the understandings provided by the use of those methods.

Task C Describe the methods used for taking, keeping, and transitioning between turns. Consider the understandings provided by the use of those methods.

Task D Consider the ways in which the interactants enact identities, roles and/or relationships.

Task 3 Select other turns within the sequence and do Tasks A–D for each of the turns.
